

PRESS RELEASE

TK Elevator takes over service at new Berlin Brandenburg Airport

- TK Elevator takes over servicing of 48 third party escalators and 147 elevators.
- The contract covers maintenance of the systems and their statutory inspection to ensure high availability.

Essen, March 25, 2021 - The new capital city airport Berlin Brandenburg Willy Brandt (BER) has been in operation since October 31, 2020. TK Elevator's sophisticated maintenance concept is designed to ensure trouble-free operation of the elevator and escalator systems and prevent breakdowns – with comprehensive support and availability around the clock every day of the year. The company is thus responsible for a total of around 200 systems from different manufacturers.

"At the new BER airport, everything has to work well – around the clock. The expectations and demands of passengers and employees are high. This makes sophisticated and comprehensive maintenance of in-house mobility all the more important. TK Elevator has both many years of experience in service and state-of-the-art technologies, which help to ensure smooth operations at the new Berlin Brandenburg Airport. Generally, we are breaking new ground with our IoT solution MAX to further improve service and transparency for our customers," explains Peter Walker, CEO of TK Elevator.

ABOUT US

TK Elevator (formerly: thyssenkrupp Elevator)

With customers in over 100 countries served by 50,000 employees, TK Elevator achieved sales of around €8 billion in the fiscal year 2019/2020. Over 1,000 locations around the world provide an extensive network that guarantees closeness to customers. Over the past decades, TK Elevator has established itself as one of the world's leading elevator companies and became independent since its sale by thyssenkrupp AG in August 2020. The company's most important business line is the service business represented by over 24,000 service technicians. The product portfolio covers commodity elevators for residential and commercial buildings to cutting-edge, highly customized solutions for state-of-the-art skyscrapers. In addition, it also consists of escalators and moving walks, passenger boarding bridges, stair and platform lifts. Integrated cloud-based service solutions, such as the MAX platform, are gaining in importance. With these digital offerings, there are no limits to urban mobility anymore. TKE – move beyond.
