

# DALIAN, CHINA

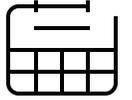

## Bayshore Hotel

Hotel

First TWIN project  
in China

Installation  
completed 2012

### Modernization

2 TWIN systems

1 Elevator

Service contract  
since: 2012

*This luxury hotel faced long elevator wait times and overcrowding due to growing passenger traffic. We modernized its system by installing two TWIN elevators and one conventional elevator. The DSC boosted handling capacity without requiring extra shaft space or structural changes. Average waiting time dropped by 68%, and arrival time by 61%. The upgrade improved traffic flow, enhanced guest experience, and reduced energy consumption by minimizing empty trips*
