43 Escalators

Self-maintenance by
Stadtwerke Bonn

TKE operates 43 escalators across the Stadtwerke Bonn (SWB) network, representing more than half of all units in service. These 43 units were delivered between 2017 and 2025 as part of multiple full replacement projects. Through these projects, TKE has provided customized, high-performance escalator solutions tailored to the demanding conditions of Bonn's transit stations. Key features include energy-efficient IE3 motors, enhanced safety and vandal protection, comprehensive water protection, and SWB-specific technical adaptations.
