8 Moving walks

Service from:
2025

*TK Elevator has been awarded a key project to replace third-party moving walkways at Miami International Airport with our innovative, space-saving **iwalk** solution. Spanning up to 320 feet, the new design boosts passenger space by two-thirds and allows faster installation within the existing structure. Selected to meet tight FIFA World Cup deadlines, this high-impact upgrade minimizes disruption—reinforcing TK Elevator's leadership in airport mobility solutions.*
