Service from:  
2010

Elevators equipped with **AGILE** Destination Controls

*TK Elevator installed 27 high-rise lifts in this iconic building in the heart of Milan, which houses the government of the Lombardy region. These systems are among the fastest in Italy, with speeds reaching 8 m/s. TKE provides dedicated service and support 365 days a year, ensuring the lifts remain in top condition. We have proudly maintained these systems since their installation.*
