Student Housing
10 floors

Installation
Completed 2026

Installed products

8 EOX elevators

2 Escalators

Service from:
2026

The brand new 'Logos' building at the University of Milan-Bicocca in Italy, which will house a university faculty, student residence, teaching offices and various services for over 4,000 students and teachers, will be equipped with state-of-the-art technology and modern comforts. The building, which has 10 floors above ground and 2 basement floors, will be equipped with two TKE escalators and eight EOX lifts, ensuring smooth, safe and efficient move-ment throughout the space. Our eco-efficient and digitally native EOX lift also requires less floor space, giving builders greater flexibility in interior design.
