Located in São Luís, Hospital Esperança UDI is a reference for medium- and high-complexity care in Maranhão, Brazil. Managed by Rede D'Or, the hospital is being expanded with an annex building adding 240 new beds. TK Elevator is supplying nine elevators to support the hospital's needs with safety and comfort. Five of these are bed elevators, designed to transport patients on their hospital beds with specially sized cabins. All units will feature the MAX predictive maintenance system, using IoT and AI to ensure efficient, reliable, and uninterrupted operation.
