Hospital

First TWIN healthcare project in mainland China

Modernization completed 2019

Modernized products

5 TWIN systems

2 Elevators

AGILE Destination Controls

Service from:
2019

This nearly century-old hospital, with 2,000 inpatient beds, faced rising elevator waiting times due to tens of thousands of daily rides. Without changing the building structure, seven elevators were modernized - five of them were replaced by TWIN elevators - cutting average waiting time by 85% and arrival time by 66%, effectively easing congestion.
