- 1 Escalators

Service from: **2024**

This ultra-custom escalator, a challenging installation project for TKE, is designed to handle an elevation difference of 4.2 meters and a capacity of over 6,000 persons per hour. Equipped with heating systems for each mechanical part and built with materials and components suitable for extreme climates, it ensures reliable operation without interruption from December to April. With an insulation class of 4, this escalator is perfectly suited for installation at 1800 meters in the Alps, providing robust performance in challenging environmental conditions.
