MAXIMUM SPACE, MINIMUM LOSS OF SPACE

The H100 home elevator uses spindle technology. This advanced technology in combination with Italian design provides an efficient and space-saving indoor solution. As a result of the compact size of the lift it is ideal for use in your existing home, when you need to make your home life-proof. The H100 fits many situations with a pit of only 50mm and a height of only 2.43 meters. And the H100 is designed so that there is no engine room is needed. This creates extra space on the platform and makes the lift perfect for smaller spaces.

Main features

Handle	Standard black, option stainless steel		
Emergency lowering system	Standard

TK HOME SOLUTIONS GIVES SECURITY

Design your own home elevator

In addition to the fact that we provide you with the highest degree of reliability as a result of our own manufacturing, the appearance, the design and the operating comfort of your elevator are of course very important too. Because we have factories in Germany, Sweden, France and Italy we can perfectly combine high technology with luxurious design.

Both our shafts and control panels and cabins are beautifully and sleekly finished. So there are no screws or other fasteners visible. All parts fit together nicely so you can enjoy our high-quality finish.

There are various options for adapting your lift to your own taste. Both the walls, the shaft and the cabin can be fitted by for glass or various colors of closed panels. The eye wants to be pleased too !

We take care of you

We give you the opportunity to be completely unburdened during the complete purchasing trajectory. In case of a turn-key solution, we take care of all architectural matters that need to be arranged. This can vary from a saving in the floor, adjusting the stairs, moving walls or even building a shaft, if necessary. It's all possible.

Your home elevator will then be delivered without you having to arrange anything yourself and you can immediately enjoy the comfort of your home elevator. We work together for this with a number of dedicated contractors.

Service guaranteed

Of course we also offer a warranty on our home elevators. The guarantee on all our home elevators is two years on all parts if serviced. After two years you get a 10-year warranty on all parts that you can expect to last more than two years such as the elevator drive and suspension..

SAFETY IS IN OUR DNA

The home lifts are equipped with an extensive list of security features. As a basic standard, the electronics is certified with safety standard SIL3. That the lifts certified with the highest possible safety standard on the market.

In addition to these legal safety standards, our home elevators have their own security system. This ensures that the elevator is not affected by mechanical disturbances in the drive system. After all, your safety is our priority.
