

SAFETY RIDING TIPS

FOR ELEVATORS

Let others exit
before boarding

Enter and exit quickly

Use the "Door Open"
button if people need to
enter after you

Watch your step
when entering or
exiting - it might not be
completely level with
the floor

Use the alarm,
help button, telephone
or intercom in case
of emergency

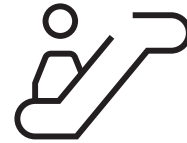

Wait for help to arrive
if you are stuck

Never attempt to stop
closing doors with your
hands, feet or body

Never use in case of fire
- take the stairs

Never try and climb out of
a stalled elevator or try
to pry open the doors

FOR ESCALATORS & MOVING WALKS

Make SURE
shoelaces are tied

Stand and face
forward

Hold an adult's
hand and the handrail

Grab the handrail
when you step on and off

Keep your hands,
feet and clothing away
from the sides

Exit quickly so
others can get
off safely

Never walk or run

Never let your feet
slide off the end

Never try and ride IN
the wrong direction

Escalators are not meant
to move wheelchairs,
strollers or carts
