

Foot-activated elevator buttons

Give passengers a hands-free elevator experience

To help reduce the transmission of germs, we're offering Toe-To-Go (T2G) foot-activated elevator call buttons by MAD Elevator Inc. Press your shoe on these hall or car station buttons to call the elevator or select your floor, and receive a hands-free elevator experience.

T2G's are easily retrofitted to existing elevator installations and come in stainless steel or brass finishes. Tenants and building guests will appreciate the new hands-free way of operating your elevators.

Features and benefits

- Enables hands-free elevator experiences
- Robust and durable design
- Easily retrofitted into existing elevator systems
- Hall station buttons are surface or flush mounted
- Wires in parallel to existing elevator buttons
- Includes keypad option for car operating panel (COP)
